Fani Bhushan

Location: Berlin, Germany | Email: fani.bhushan@mercedes-benz.com

Professional Summary

Senior Technical Leader and Architect with 16+ years of experience in embedded systems, automotive infotainment, and connected car services. A proven track record of leading cross-functional teams, executing strategic product roadmaps as Acting Product Owner, and delivering high-impact software solutions. Highly skilled in aligning technical architecture with business strategy, resolving critical bug escalations, and mentoring engineers.

Core Skills & Competencies

Programming Languages:	C++, Qt/QML, C#, Golang, Java, Python, Kotlin(beginner)
Architectures & Systems:	Dialog Engines, Connected Car Platforms, Microservices, Containerization (Docker), Navigation system, Embedded Linux, Infotainment systems
Leadership & Methodologies:	Agile/Scrum, CSPO (Certified Scrum Product Owner), PI Planning, Line Management, Stakeholder Management, CI/CD, Automated Testing

Professional Experience

Expert Software Engineer / Acting Product Owner *03/2018 – Present*
MBition GmbH (Mercedes-Benz Innovation) Berlin, Germany

- **AI Integration & Production Release:** Did the POC and led the actual development for production and delivered within deadline.
- **Product & PI Leadership:** Served as Acting PO for Speech Assistant and MBUX Online Media. Handled PI planning, backlog, capacity, and stakeholder escalations.
- **Connected Car Services:** Architected and led the development of Qt/Golang/Java-based multi-platform connected car services and UI platforms for Mercedes-Benz.
- **Containerized Apps:** Managed end-to-end implementation and FOSS certification for speech container services and in-vehicle payment apps (*Fuel & Pay*).
- **MBUX Infotainment UI:** Directed development of the Qt/C++ Online Media UI, collaborating with distributed international teams.

Software Technical Lead *05/2010 – 01/2018*
Wipro Technologies Germany / Tokyo, Japan / Bangalore, India

- **Line Management & Leadership:** Managed engineering team career growth, performance evaluations, and resource planning.
- **On-site Client Coordination:** Directed stakeholder negotiations, onsite-offshore collaboration, and vehicle test drives in Germany and Japan (Panasonic).
- **UI Testing Tool Development:** Led development of a C#-based UI testing tool integrated with Python and Perl for automated testing.
- **Navigation & Firmware Systems:** Developed routing and route guidance components in C++, and firmware for smart meters and robotic vacuum cleaners using Embedded C and RTOS.
