Fani Bhushan

Berlin, Germany bhufani@gmail.com 0176 84733947 fani-bhushan

Professional Summary

Software engineer with 16 years of experience in technical leadership and software development, specializing in automotive infotainment and connected car services. Led the development of a Qt/C++-based Online Media UI for MBUX and architected multi-platform connected car services for Mercedes-Benz. Seeking a leadership role to apply my expertise in technical leadership and cloud-native solutions to drive innovation.

Experience

Expert Software Engineer, MBition GmbH – Berlin, Germany Mar 2018 – present

- Led the Dialog Engine integration (central embedded business logic component) for a high-priority LiquidAI NLU/ASR model POC in the US market, which successfully green-lit the project and secured a 4.5 FTEs team budget.
- Completed CSPO certification and served as Acting Product Owner for the Speech Assistant, leading PI planning, backlog management, capacity planning, and resolving critical blocker bug escalations.
- Took ownership of a critical speech container service to implement an urgent feature, managing the end-to-end implementation, FOSS compliance, and market release.
- Led the development of and implemented a Qt/C++-based Online Media UI application for the MBUX Infotainment system on Linux, collaborating with geographically dispersed teams.
- Contributing as an expert to the development of a Linux-based speech assistant using C++, Python, and Golang, leveraging Large Language Models (LLMs).
- Deputy Product Owner, negotiating with stakeholders, coordinating across teams, and facilitating collaboration for multiple product lines.
- Architected and led the development of Qt/Golang/Java-based multi-platform connected car services for Mercedes-Benz.
- Resolved critical bug escalations and acted as Engineering Lead and Product Owner in their absence.
- Mentored and coached engineering teams, driving best practices, scalability, and maintainability.
- Led cross-functional collaboration with product managers, cloud backend teams, and UI developers to align technical roadmaps with business objectives.
- Developed the Connected Services UI platform using Qt/QML and C, integrated into a Linux-based UI package.
- Developed multiple Qt/C++-based connected car standalone and template apps, working closely with cloud backend and HU services teams.

Software Technical Lead, Wipro Technologies – Bangalore, India / Tokyo, Japan / Germany May 2010 – Jan 2018

- Handled line management responsibilities for the engineering team, including career mentorship, performance evaluations, and resource planning.
- Led a team in the development of automotive infotainment projects using C++, including routing and route guidance components for the Navigation System.
- Managed a team working on a C#-based UI testing tool, incorporating Python and Perl scripting at Panasonic Automotive System Japan.
- Worked on-site in Japan, collaborating with clients/stakeholders while coordinating with offshore teams.
- Defined engineering processes, quality standards, and best practices improving team efficiency and product reliability.
- Worked on firmware development for a robotic vacuum cleaner using Embedded C and RTOS.
- Developed firmware for a smart meter, utilizing Embedded C and RTOS.
- Worked on-site in Germany, participating in test drives and handling product quality discussions with clients.

Education

Gandhi Institute of Engineering And Technology, Bachelors in Technology in Computer Science – India July 2005 – May 2009

Certifications

- Certified Scrum Product Owner (CSPO)
- Certified Professional for Software Architecture (iSAQB)
- Software Architecture Certification from Global Dev Experts

Skills

Programming Languages: C++, C#, Golang, Java, Python, Perl, Embedded C

Frameworks \& UI: Qt/QML, RTOS, Docker, Containers

Cloud \& Microservices: Microservices, Azure Cloud, gRPC

Domains: Automotive Infotainment, Connected Car Services, Navigation Systems, Speech Assistants, LLMs (LiquidAI, ASR/NLU)

Methodologies \& Tools: TDD, Automated Testing, GitLab CI, Azure DevOps, Agile, Scrum

Languages

English: Fluent

Hindi: Fluent

German: B1
